## **Obstetrics, Gynecology & Infertility**

Dear Patient,

In our patient's best interest, please invite no more than one person to attend your sonogram. Small children are often frightened by the dark room and unfamiliar surroundings. Crying children and a room crowded with people serve only as a distraction for our sonographer. Please understand that these restrictions are not placed to minimize the joy of seeing your child and sharing this with your family. Rather, these limits are requested to allow our sonographer full concentration while scanning your child for any potential problems. You are welcome to bring a DVD-R/CD-R for a keepsake at the end of your OB sonogram. However, we have been informed that these may not play on your DVD player, but should play on your computer.

Thank you for your cooperation.

Sincerely,

Sherie Machala, Sonographer  
Drs. Bankston and Hartley
